

HAMPSHIRE NOTABLE SPECIES VASCULAR PLANT CHECKLIST: CRITICAL GENERA

KEY

Potentilla neumanniana	Main Rare Plant Register entry
Potentilla x suberecta	Secondary Rare Plant Register entry: hybrid, locally extinct plant, rarity known or strongly suspected of occurring only as an introduction or casual in the county
Potentilla anglica	Other notable species: scarce, declining, special conservation significance or other interest
<i>Potentilla palustris</i>	Candidate notable plant: current status or rarity not fully known in at least part of the county
[<i>Prunella laciniata</i>]	Known or strongly suspected to be extinct in the county
(<i>Lagurus ovatus</i>)	Known or strongly suspected only to occur as an introduction or casual in the county

These typographical features may be combined in one entry.

RECORDING AREA

The recording area embraces vice-county 11 (including those portions now in administrative Dorset), vice-county 12, and all of administrative Hampshire (including areas in other vice-counties such as vice-county 8, South Wiltshire).

If you are uncertain whether a record falls within the covered area, please submit it with a full 6-figure ('SU123456') or 8-figure grid reference.

- All Qualifies for notables list on basis of national rarity or status across whole of recording area. Detailed records needed throughout.
- 11 Qualifies for notables list on basis of status in vice-county 11. Detailed records needed from vc11. Detailed or 1km² records welcomed from elsewhere.
- 12 Qualifies for notables list on basis of status in vice-county 12. Detailed records needed from vc12. Detailed or 1km² records welcomed from elsewhere.
