

**Centaurium portense (C. scilloides), 1990-2023, at least 6 Best to Search: late June - late July**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Cold Ash, Bramshott Common	SU858329	19-Jun-99	At SU858329 and SU859328½, but quantity not as impressive as last year.
Cold Ash, Bramshott Common	SU858329	05-Jul-98	
Bramshott Common	SU859328	30-Jun-11	Large colonies at SU85924 32838 and SU85915 32825.
Bramshott Common	SU859328	26-Jun-11	Conspicuous patches on heathland in full flower, well away from houses, 3m x 2m patch at SU8592 3284, 1m patch at SU8591 3282 and 20cm patch at SU8592 3284. (Did not have time to search for the other formerly known site c.100m to north).
Bramshott Common	SU859328	24-Jul-03	At SU85932 32860. 'Seven plants in two clumps. Cultivated plant.' Specimen V.2003.001.042 in NMW.
Cold Ash, Bramshott Common	SU859328	05-Jul-98	8 plants [in addition to 858329]. 'I suspect there was a building there years ago'.
Cold Ash, Bramshott Common	SU859328	28-Jun-98	SU859328½, 8 spreading clumps
Bramshott Common	SU859329	30-Jun-11	Small remnant colony refound at SU85911 32924, but this patch almost smothered by brambles. Photo confirmed.
Bramshott Common	SU859329	28-Jun-98	1 plant

I have omitted some earlier records, or duplicates, with the same grid reference.

I fear these have all died out as the last time I visited there was no sign of it.
