

Website Threatened Plant records in VC12.xlsx

Groenlandia densa, 1990-2023, at least 6 fig grid ref **Best to Search: May - September**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Chilland	SU522325	11-Oct-03	
Tichborne House moat	SU573304	17-Nov-09	A single patch in the west end of the moat. The moat had recently been drained and re-lined - so possibly this is a seed bank relic.
Cheriton Mill	SU579296	03-May-97	River Itchen.
Cheriton North End	SU580291	25-Jul-11	Itchen headwaters, a 7 m. clump, SU58092913
Hatch, near River Lyde	SU681525	10-Dec-09	Occasional to dominant along about 25m of the stream amongst Juncus and Equisetum fluviatile.
Hatch, near River Lyde	SU681525	11-Jun-09	In abundance along 18m of ditch from SU68113 52541 to SU68101 52555.
Ludcombe Pond	SU735264	27-Apr-21	Still present, but greatly reduced in quantity.
Steep, N of	SU735264	28-Aug-14	Still in good quantity at the outlet end of Lutcombe Pond, dominant in a patch c.8m x 4m. [Searched for on 14 May 2019, but not refound.]
Steep, N of:	SU735264	21-Dec-12	In Lutcombe Pond SU7356 2641. Plants at outfall end of pond covering an area of c.5 square metres.

I have omitted some earlier records, or duplicates, with the same grid reference.
